Frontend: React, Tailwind CSS
Backend: Node.js, Express.js, MongoDB (Atlas), Firebase
Tools & Platforms: Vite, Git/GitHub, JWT, Vercel, RESTful APIs

Projects

Educational Website

Educational Website "Education made simple. Our platform offers everything students need to enroll, learn, and track their progress, ensuring a seamless experience for both students and administrators."

[🔗 Live demo](#) | [Front-end code](#) | [Back-end code](#)

Key Features:

- Real-time Updates – Instantly update the UI to reflect changes in course availability, admission announcements, and student status, keeping everything current without refreshing.
- Responsive Design – Optimized to work seamlessly across all devices, ensuring a smooth and consistent experience on both mobile and desktop.
- Course Enrollment – Students can easily apply for courses directly from the website.

Project Stack : React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT

building-management

A responsive and user-friendly car rental platform that allows users to effortlessly browse, book, and manage vehicle rentals. Enjoy a seamless experience with real-time availability, secure payments, and hassle-free booking management

[🔗 Live demo](#) | [Front-end code](#) | [Back-end code](#)

Key Features:

- User Authentication – Both Admin and User can register and log in using Google authentication, ensuring quick and secure access for all.
- Product Listings – Admins can effortlessly add and manage product listings, while users can browse and view available products with detailed information.
- Order Management – Users can place and track orders, while Admins can manage order details, update statuses, and oversee the entire order lifecycle.

Project Stack : React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT

Ecommercer Webside

"A responsive and user-friendly eCommerce platform that allows users to effortlessly browse, shop, and manage their orders. Enjoy a seamless experience with secure payments, real-time tracking, and hassle-free order management."

[🔗 Live demo](#) | [Front-end code](#) | [Back-end code](#)

Key Features:

- Product Listings – Add and manage product listings effortlessly.
- Order Management – Place orders, track them, and manage order details.
- Responsive Design – Fully functional on both mobile and desktop devices.

Project Stack : React, Tailwind CSS, Node.js, Express.js, MongoDB, GitHub
